

WE SMASH GLASS INTO CASH

The **ANDELA PULVERIZER SYSTEM** diverts tons of glass daily from our nation's costly & overburdened landfills. **The Pulverizer** processes raw glass waste into usable sand & gravel. Feed in mixed, broken, unsorted glass & take out round-edged aggregate. Metal, plastic & most paper is removed without hand sorting.

Systems customized for integration into any operation & sized from 1-20 tons per hour.

The PULVERIZER, in place & running everyday at recycling plants around the country, is designed for reliability. Our patented, flexible impact mechanism avoids the wear associated with grinders. Heavy duty bearings are sealed & isolated, & all wear parts can be easily accessed & replaced.

The **Andela Trommel** screen separates pulverized glass into two aggregate sizes—for use as sand & gravel

Glass Aggregate safe enough for a sandbox!

DOLLAR FOR DOLLAR & pound for pound, The **Andela Pulverizer System** is the most economical & efficient system on the market today!
